15.	Suspension and termination
16.	Eligibility
17.	Amendments to these Terms
18.	Severability, waiver and entire agreement
19.	Governing law and jurisdiction
20.	How to contact us

1. Acceptance of these Terms

1. These Terms of Use (the "**Terms**") form a binding agreement between you ("**you**", the "**User**") and the operator of Lets Me Show ("**we**", "**us**", the "**Operator**").
2. By downloading, installing, launching or using the Software, or by using the Website or the screen-sharing service, you confirm that you have read, understood and agreed to be bound by these Terms in full.
3. **If you do not agree with any part of these Terms, do not install or use the Software.** Uninstalling the Software and ceasing to use the Website is your complete and only remedy if you disagree with them.
4. These Terms also apply to any person who opens a screen-sharing link and views a Session, whether or not that person has installed the Software.

2. Definitions

Term	Meaning
Software	The Lets Me Show desktop application for Windows and Linux, in any version, including updates.
Website	letsmeshow.com and any subdomain operated by us, including the viewer page and the update feed.
Signalling Relay	The small server operated by us whose only function is to exchange connection parameters between two endpoints so that they can establish a direct connection.
Third-Party Proxy Server	Any SOCKS5 proxy server that the Software may connect to. These are operated by parties unknown to us. See clause 5.
Room	A group of Participants connected through a six-character code, in which any Participant may transmit voice and may transmit a screen.
Participant	Any User present in a Room. All Participants have the same abilities; the one who created the Room has no additional powers.
Sharer	A Participant who is transmitting a screen or window at a given moment.
Shared Content	Everything visible in the screen or window a Sharer transmits, and any audio a Participant transmits, whether from a microphone or from their computer.

3. Licence and cost

1. **The Software is provided free of charge.** There is no purchase price, no subscription, no trial period, no paid tier, no usage limit tied to payment, and no feature withheld behind a payment. We

do not request or process payment information of any kind.

2. Voluntary donations may be offered on the Website. A donation is a gift. It buys no product, grants no additional right, creates no obligation on our part, entitles the donor to no support or service level, and is not refundable.
3. Subject to these Terms, we grant you a worldwide, royalty-free, non-exclusive, perpetual licence to install, run and use the Software for any purpose, personal or commercial, on any number of devices, and to redistribute it unmodified. The Software is published under the MIT licence; where these Terms and that licence conflict as to the licence grant, the MIT licence prevails.
4. You may not represent modified builds as official, distribute the Software bundled with malware or unwanted software, charge others for the Software itself as though it were a paid product, or use our name or marks in a way that suggests endorsement we have not given.
5. Because the Software is supplied free of charge and without consideration, no consumer guarantee that depends on the existence of a sale, price or contract of purchase can arise from it. Nothing in this clause limits rights that cannot lawfully be excluded.

4. What the Software does

This clause describes the actual technical behaviour of the Software. It is included so that your consent is informed, and it forms part of these Terms.

4.1 Connection routing for Discord

1. The Software locates an existing installation of the Discord desktop client, closes it if it is running, and starts it again with standard command-line switches that the Chromium engine already supports, namely `--proxy-server` and `--proxy-bypass-list`.
2. **The Software does not modify, patch, decompile, reverse engineer, inject code into, hook, or alter the memory, files or behaviour of Discord or of any other program.** It supplies documented start-up parameters to a program that already accepts them, and nothing more.
3. The bypass list is configured so that voice, video and content-delivery traffic continue over your own connection. Only the traffic that Discord itself directs through the proxy is affected.
4. Turning the feature off closes Discord and starts it again with no proxy parameters at all.

4.2 Rooms, voice and screen sharing

1. A Participant may create a Room, which is identified by a six-character code generated locally and at random. Any person given that code may join the Room from their own installation of the Software, up to a technical maximum of eight Participants.
2. All Participants in a Room are equal. Each may transmit voice from their microphone, may transmit a screen or a single application window, and may leave at any time. The Participant who created the Room holds no additional powers over the others.
3. The Software captures only the display or the single application window a Participant explicitly selects, and, where that Participant switches it on, the audio playing on their computer. Nothing

else on their machine is captured or transmitted.

4. Voice and screen are transmitted directly between Participants using WebRTC. **They do not pass through any server operated by us.**
5. A Room exists only while at least one Participant is present. When the last Participant leaves, the Room and its code cease to exist immediately.

5. Third-party proxy servers: no ownership and no control

We do not own, operate, host, rent, fund, control, vet, monitor, audit, endorse or have any relationship whatsoever with any proxy server that the Software may connect to.

1. In automatic mode, the Software retrieves a publicly available list of SOCKS5 proxy servers published by unrelated third parties, tests entries from that list, and uses one that responds. We have no involvement in the creation, curation, funding or operation of that list or of the servers on it.
2. The operators of those servers are unknown to us. They may be individuals, companies, automated systems or malicious actors. They may log, inspect, intercept, modify, retain, sell or disclose any traffic that passes through them. They may cease to function without notice.
3. **You should treat every Third-Party Proxy Server as untrusted.** You accept that any traffic routed through such a server may be observed by its operator, and you use the automatic mode entirely at your own risk and on your own judgement.
4. You may instead supply the address of a SOCKS5 server of your own choosing. If you do, you alone are responsible for that server, for your authority to use it and for everything that follows from its use.
5. We accept no liability of any kind arising from the conduct, availability, performance, security, honesty or lawfulness of any Third-Party Proxy Server, or from any list on which such a server appears.
6. The Software also contacts publicly available STUN servers operated by third parties in order to discover network addresses for the purpose of establishing a direct connection. The same absence of ownership, control and liability applies to those servers.

6. Rooms and the Signalling Relay

1. Two computers on the internet cannot locate each other unaided. We therefore operate one small server, the Signalling Relay, whose functions are limited to introducing Participants to one another, holding the list of who is currently in a Room, and passing connection parameters between them.
2. **Shared Content never passes through the Signalling Relay.** Voice and screen travel directly from each device to the others. We do not receive them, cannot receive them, do not process them, do not record them and have no technical means of accessing them.

3. The Signalling Relay holds, in volatile memory only, the room code, a numeric identifier for each Participant, and the display name and picture that Participant chose. It writes none of this to persistent storage. All of it is destroyed when the Room empties, and every Room is destroyed if the service restarts.
4. A display name and picture are chosen by the Participant, stored on that Participant own computer, and shown only to the other Participants of a Room they join. We do not retain them.
5. **We do not record, store, archive, transcode, analyse, moderate or retain any Room, any conversation or any Shared Content at any time, by any means.** No copy exists anywhere in our possession or control, during a Room or afterwards.
6. Because no direct connection can be guaranteed on every network, some Participants may be unable to connect to some others. This is a property of the networks involved and not a defect. We give no undertaking that any Room will function.

7. Data: what we do not hold, and what necessarily occurs

We have designed the Software so that there is as little data as possible for anyone to lose, demand or misuse. This clause states plainly both what we do not do and the limited, unavoidable things that do occur, so that nothing in this document overstates our position.

7.1 What we do not do

- We do not require, offer or operate user accounts, profiles, logins or identifiers.
- We do not collect names, email addresses, telephone numbers or postal addresses, except an email address you choose to write to us yourself.
- We do not collect, transmit or store the contents of your screen, your windows, your messages, your voice or your video.
- We do not collect the contents of any conversation in a Room.
- We do not operate analytics, telemetry, behavioural tracking, advertising, fingerprinting or tracking cookies.
- We do not sell, rent, licence, share or disclose personal data to third parties, because we do not assemble it.
- We do not build profiles, and we do not correlate one visit or Session with another.

7.2 What necessarily occurs

Occurrence	What it involves
Connection metadata	Any connection to the Website or the Signalling Relay discloses your IP address to the hosting and content-delivery providers that serve them. This is inherent to how the internet functions and is true of every website. We do not use it to identify or profile anyone.
Abuse protection	The Signalling Relay counts, in memory only, how many connections come from an address within a short window, so that one party cannot exhaust the service. These counters are transient and are discarded continuously.
Update check	The Software requests a small file from the Website to learn whether a newer version exists. The request contains no identifier of you or your installation.
Download counter	Selecting a download link increments an anonymous total, together with the operating system chosen. It records no address, no identifier and nothing capable of distinguishing one person from another. It is a number, not a record.
Correspondence	If you write to us, we hold your message and your address for as long as needed to answer you.

1. Where any of the above constitutes processing of personal data under applicable law — including Brazilian Federal Law No. 13.709/2018, the *Lei Geral de Proteção de Dados Pessoais* ("LGPD") — our lawful basis is the legitimate interest of the Operator in providing, securing and maintaining a free service, under article 7, item IX of that Law, and the processing is limited to what that purpose strictly requires.
2. You may exercise the rights granted to you by applicable data protection law, including the rights of confirmation, access, correction, anonymisation, portability and deletion, by writing to the address in clause 20. We will respond within the period required by law.
3. You may contact us at the address in clause 20 to ask what we hold in relation to you. Our answer will in most cases be that we hold nothing, because there is nothing to hold.

8. Your responsibilities

1. **You are solely responsible for everything you transmit.** Before starting a Session you must ensure that you have the right to display the Shared Content and that displaying it breaches no law, contract, confidentiality obligation, intellectual property right or privacy right of any person.
2. You must not use the Software to transmit, display or distribute content that is unlawful, that infringes the rights of others, that depicts the abuse of any person, that harasses or threatens, or that you are otherwise not entitled to share.
3. You are responsible for who you give a room code to. Anyone holding a current code can join that Room, hear what is said in it and see whatever is being shared. A code cannot be revoked: to exclude someone, leave the Room and create another.

4. You must comply with the terms of service of any third-party platform you use the Software alongside, including Discord. **It is your responsibility, not ours, to determine whether your use of the Software is consistent with those terms**, and you accept the consequences of that determination.
5. You must comply with all laws applicable to you, including any law governing the use of proxy servers or the routing of network traffic in your jurisdiction. The Software is not offered where its use would be unlawful.
6. You must not attempt to disrupt, overload, probe or circumvent the limits of the Signalling Relay, nor use it other than as an incidental part of ordinary use of the Software.

9. Relationship with Discord and other third parties

1. **Lets Me Show is not affiliated with, associated with, authorised by, endorsed by, sponsored by, or in any way officially connected to Discord Inc. or any of its subsidiaries or affiliates.** "Discord" and all related names, marks and logos are the property of their respective owners and are used here for identification and descriptive purposes only.
2. We do not control Discord's service, its rules, its enforcement decisions or any change it may make. Discord may alter its software or its policies at any time in a way that changes or prevents the operation of the Software, and we have no obligation or ability to prevent that.
3. **We make no representation and give no assurance regarding any action that Discord or any other platform may take in respect of your account, including restriction, suspension or termination.** You use the Software in full knowledge of that uncertainty and accept the entire risk of any such action.
4. The same absence of affiliation, control and responsibility applies to every other third party whose service the Software may interact with, including proxy list publishers, proxy operators, STUN providers, operating system vendors and browser vendors.

10. Installer signing and integrity

1. The installers are not currently signed with a code-signing certificate. Operating systems and browsers may therefore warn that the publisher cannot be verified. That warning concerns the absence of a certificate and is not a finding about the contents of the file.
2. We publish a SHA-256 checksum for every file we release. You are able, and are encouraged, to verify any downloaded file against the published checksum before running it.
3. **You should obtain the Software only from letsmeshow.com.** We accept no responsibility whatsoever for any copy obtained elsewhere, which may have been altered. Any file whose checksum does not match the published value is not our Software and should not be run.
4. The Software's built-in update mechanism verifies the checksum of any update before it is executed and refuses an update that cannot be verified.

11. Availability, changes and discontinuation

1. The Software and the Signalling Relay are provided on a best-effort basis. We offer no service level, no uptime commitment, no support commitment and no guaranteed response time.
2. We may at any time and without notice or liability modify, suspend, restrict, or permanently discontinue the Software, the Website, the Signalling Relay or any feature of any of them, in whole or in part.
3. We are under no obligation to release updates, to maintain compatibility with any third-party software, or to preserve any feature.
4. Copies of the Software already installed will continue to run as they are able; features that depend on a service we discontinue will cease to function.

12. Disclaimer of warranties

THE SOFTWARE, THE WEBSITE AND THE SIGNALLING RELAY ARE PROVIDED "AS IS" AND "AS AVAILABLE", WITH ALL FAULTS AND WITHOUT WARRANTY OF ANY KIND.

To the fullest extent permitted by applicable law, we expressly disclaim all warranties, conditions, representations and terms, whether express, implied, statutory or otherwise, including without limitation any implied warranty of merchantability, satisfactory quality, fitness for a particular purpose, accuracy, quiet enjoyment, title and non-infringement.

1. Without limiting the above, we do not warrant that the Software will function without interruption or error, that any defect will be corrected, that it will be compatible with your hardware, operating system or other software, that it will achieve any particular result, that any connection will succeed, that any proxy server will be available, honest, private or secure, or that the Software or our servers are free of harmful components.
2. No advice or information, oral or written, obtained from us or through the Software or the Website creates any warranty not expressly stated in these Terms.
3. Some jurisdictions do not allow the exclusion of certain warranties. Where that is so, the exclusions above apply to the fullest extent permitted, and any warranty that cannot lawfully be excluded is limited in duration and scope to the minimum permitted by law.

13. Limitation of liability

TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW, WE SHALL NOT BE LIABLE FOR ANY DAMAGE OF ANY KIND ARISING OUT OF OR IN CONNECTION WITH THE SOFTWARE, THE WEBSITE, THE SIGNALLING RELAY OR THESE TERMS.

1. This exclusion applies to direct, indirect, incidental, special, consequential, exemplary and punitive damages, and includes without limitation loss of profit, loss of revenue, loss of business, loss of goodwill, loss of opportunity, loss of anticipated saving, loss, corruption or unauthorised disclosure of data, business interruption, device or system damage, and the cost of substitute goods or services.
2. It applies regardless of the theory of liability, whether contract, tort (including negligence), strict liability, statute or otherwise, and applies even if we have been advised of the possibility of such damage and even if a limited remedy is found to have failed of its essential purpose.
3. Without limiting the generality of the above, we are not liable for: loss or suspension of any third-party account, including any Discord account; the conduct, failure, dishonesty or surveillance of any Third-Party Proxy Server or its operator; the interception, observation, retention or disclosure of traffic by any third party; the conduct of any Participant, including the recording, photographing or redistribution of Shared Content by another Participant using means outside the Software; the disclosure of anything a Sharer chooses to display; the sharing or guessing of a room code; or the unavailability of any service.
4. **Where liability cannot lawfully be excluded, our total aggregate liability arising out of or in connection with the Software, the Website, the Signalling Relay and these Terms is limited to the greater of (a) the total amount you have paid us for the Software, which is zero, and (b) the minimum amount permitted by applicable law.**
5. Nothing in these Terms excludes or limits liability for death or personal injury caused by negligence, for fraud or fraudulent misrepresentation, or for any other liability that cannot lawfully be excluded or limited.
6. You acknowledge that the allocation of risk in this clause is a fundamental element of the basis on which the Software is made available to you at no charge, and that we would not make it available on any other basis.

14. Indemnity

1. To the fullest extent permitted by applicable law, you agree to indemnify, defend and hold harmless the Operator and its contributors from and against any claim, demand, proceeding, loss, liability, damage, cost and expense, including reasonable legal fees, arising out of or connected with your use of the Software, any Shared Content you transmit, your breach of these Terms, your breach of any law, or your breach of the rights of any third party.
2. We reserve the right to assume the exclusive defence and control of any matter otherwise subject to indemnification by you, at your expense, and you agree to cooperate with that defence.

15. Suspension and termination

1. These Terms apply for as long as you use the Software or the Website. You may terminate them at any time by ceasing all use and uninstalling the Software.
2. We may restrict or refuse access to the Signalling Relay, at our discretion and without notice, where we consider it necessary to protect the service or others, including in response to abuse, excessive

load or unlawful use. We do not monitor Rooms or Shared Content and are technically unable to do so.

3. Clauses 5, 7, 8, 9, 12, 13, 14, 18, 19 and 20 survive termination.

16. Eligibility

1. You must have the legal capacity to enter into a binding agreement in your jurisdiction. If you are a minor, you may use the Software only with the consent and supervision of a parent or legal guardian, who accepts these Terms on your behalf.
2. The Software is not directed at children, requires no account, and collects no information from which the age of any user could be determined.

17. Amendments to these Terms

1. We may amend these Terms from time to time. The current version is always published on the Website and carries a document version and an effective date.
2. Amendments take effect when published. Your continued use of the Software or the Website after that date constitutes acceptance of the amended Terms. If you do not accept them, you must stop using the Software.
3. We will not apply an amendment retroactively to a dispute that arose before it took effect.

18. Severability, waiver and entire agreement

1. If any provision of these Terms is held invalid, unlawful or unenforceable, that provision shall be modified to the minimum extent necessary to make it enforceable, or if it cannot be, severed. The remaining provisions continue in full force.
2. Our failure or delay in enforcing any provision is not a waiver of it, and no single or partial exercise of any right prevents any further exercise of that or any other right.
3. These Terms, together with any notice published on the Website and expressly incorporated into them, constitute the entire agreement between you and us regarding the Software and supersede all prior understandings on the subject.
4. You may not assign or transfer these Terms. We may assign them to a successor in connection with a transfer of the project.
5. Nothing in these Terms creates a partnership, joint venture, agency or employment relationship between you and us.

19. Governing law and jurisdiction

1. Lets Me Show is operated by **Dexter**, of the City of São Paulo, State of São Paulo, Federative Republic of Brazil, contactable at help@letsmeshow.com (the "**Operator**").

2. These Terms and any dispute or claim arising out of or in connection with them, their subject matter or their formation, including non-contractual disputes and claims, are governed by and construed in accordance with the laws of the Federative Republic of Brazil, without regard to its conflict-of-law rules.
3. The courts of the Judicial District of São Paulo, State of São Paulo, Brazil, have exclusive jurisdiction over any dispute arising out of or in connection with these Terms, save that nothing in this clause deprives a consumer of the protection of the mandatory rules of the law of the country in which that consumer is habitually resident, nor of the right to bring proceedings before the courts of that country where applicable law so provides.
4. The United Nations Convention on Contracts for the International Sale of Goods does not apply to these Terms.

20. How to contact us

1. For any question about these Terms, about what we hold in relation to you, or to report misuse of the Software, write to **help@letsmeshow.com**.
 2. We answer as we are able. As stated in clause 11, we give no guaranteed response time.
-

Lets Me Show — Terms of Use and Data Statement, document version 1.1, effective 4 September 2026. This document is published at letsmeshow.com and supersedes all earlier versions.

This document describes the behaviour of Lets Me Show version 2.2.0. Where a later version of the Software changes that behaviour materially, this document will be revised and its version number increased.
